Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claim 12 is objected to because of the following informalities: The claim does not have a transitional phrase to separate the body from the preamble. See MPEP 2111.03. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12, 13, 20 & 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Genna (5,587,698).

In regards to claim 12, Genna teaches a tire pressure monitoring system wherein the temperature compensation is effected by determining the gas temperature in the tire by way of at least two items of temperature information (i.e. tire surface temperature and second preset tire surface temperature values) (Column 10, lines 28-39 & Column 25, lines 1-17) and the determined gas temperature is made the basis for tire pressure monitoring (Column 10, lines 10-16).

Art Unit: 2855

With respect to claim 13, Genna teaches wherein a temperature sensor (85) at or in the wheel rim of the tire is made the basis for at least one item of temperature information (Column 15, lines 52-61; See Figures 3 & 7).

With respect to claim 20, Genna teaches wherein the gas temperature determined is used to correct a pressure value determined for the tire (The tire pressure control system corrects the pressure within the tire by adding air from the compressor when a loss of pressure is detected by utilizing air pressure and air temperature values; Column 10, lines 28-39).

With respect to claim 21, Genna teaches wherein the pressure value being determined by means of a pressure sensor arranged in the tire (Column 15, lines 52-61; See Figures 3 & 7).

Allowable Subject Matter

4. Claims 14-19 & 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2855

- U.S. Patent 5,071,259 (Metzger et al) – Sensor for Measuring the Pressure and Temperature of Tires
